

A communication system is provided, in which the communication system includes: a part for receiving a call establishment request from a

5 communication terminal, and sending, to the
communication terminal, a call forwarding
destination information including information on at
least a call forwarding destination; and a part for
receiving information on a call forwarding
10 destination which is selected by a caller from the
communication terminal, and allowing the
communication terminal and the call forwarding
destination to communicate with each other according
to the information on the call forwarding
15 destination.
